Forecast for Thursday 01 Jul 2021

Weather: Dry with clear spells for much of the Park overnight. There is a risk of some short lived mist patches in the valleys during the early hours. Low cloud moving in from the North Sea may reach eastern fringes of the Park during the morning, but this should gradually clear during the afternoon. Elsewhere a dry day with sunny spells and cloud above the hilltops. Slight risk of a shower later in the evening.

Chance of cloud free mountain/hill tops above 600m: 60% in the east, 90% in the west during the morning. Becoming 100% for all areas during the afternoon.

Visibility: Areas of low cloud are possible in the eastern fringes with bases around 400m, giving very poor visibility on hilltops with nearby landmarks obscured. Some brief patches of low cloud may be seen around dawn, but this will soon lift. Otherwise visibility will be good with clear views of distant ranges.

Forecast for Friday 02 Jul 2021

Weather: Low cloud moving in from the North Sea to affect mainly eastern areas, but clearing during the morning. Otherwise there is a risk of mainly light showers on Friday, although the odd heavier burst is possible, with some sunny spells mainly in the afternoon.

Maximum wind: Easterly or southeasterly 10-15mph later in the day.

Chance of cloud free mountain/hill tops above 600m: 40% in eastern areas, 70% in western areas during the morning. Becoming 100% for the afternoon.

Visibility: Areas of cloud with bases 300-400m are possible in the morning, especially in eastern areas, giving very poor visibility on hilltops with nearby landmarks obscured. Otherwise visibility will be good with clear views of distant ranges, although these will be temporarily obscured in any showers.

Temperature: **Valleys:** Plus 9C becoming plus 19C
At 600m: Plus 8C becoming plus 13C
Freezing level: Well above the summits
